Table of Contents

Introduction vii

COUNTY RANKINGS 1

Population Rankings—New Mexico Counties 1
Employment Rankings—New Mexico Counties 2
Income and Wage Rankings—New Mexico Counties 3
Health and Vital Statistics Rankings—New Mexico Counties 4
Medicaid, Food Stamp and Poverty Rankings—New Mexico Counties 5

AGRICULTURE 7

Farm Sizes and Values—New Mexico 7
Livestock Inventory and Value—New Mexico 7
Cash Receipts from Livestock Products and Crops—New Mexico 7
Farm Sizes and Values—New Mexico Counties 8
Farm Income and Sales—New Mexico Counties 9
Farm Employment—New Mexico Counties 10

CLIMATE AND WATER 11

Climate Annual Summaries—Selected New Mexico Weather Stations 11
Water Use by Category—New Mexico 11
Water Use—New Mexico Counties 12
Per Capita Water Use—New Mexico Counties 12

CONSTRUCTION 13

Value of Construction Contracts—New Mexico 13
Number of Building Permits or Units—Selected New Mexico Cities, 1983 and 1984 14
Number of Building Permits or Units—Selected New Mexico Cities, 1985 and 1986 15
Value of Building Permits—Selected New Mexico Cities, 1983 and 1984 16
Value of Building Permits—Selected New Mexico Cities, 1985 and 1986 17

CRIME AND LAW ENFORCEMENT 19

Crime Rates—Selected States, 1985 19
Crime Rates—Selected States, 1986 19
Number of Criminal Offenses—Metropolitan and Nonmetropolitan New Mexico 21
Number of Criminal Offenses—Selected New Mexico Cities, 1985 22
Number of Criminal Offenses—Selected New Mexico Cities, 1986 23
State of New Mexico Prison Population 24
Full-Time Law Enforcement Employees—Selected New Mexico Cities 24

EDUCATION 25

Public Education Profile—New Mexico 25
Expenditures Per Pupil in Public Schools—New Mexico 26
Public School Pupil-Teacher Ratios—New Mexico 27
Schools Specified by Type—New Mexico 27
Enrollment in Public Institutions of Higher Education by Race, Ethnicity and Sex—New Mexico 28
Average Daily Membership in Public Schools—New Mexico Counties 29
Public High School Enrollment by Race and Ethnicity—New Mexico School Districts 30
Median School Years Completed by Race and Ethnicity—New Mexico Counties 31

EMPLOYMENT 33

Civilian Labor Force—New Mexico 33
Civilian Labor Force—New Mexico Counties, 1985 34
Civilian Labor Force—New Mexico Counties, 1986 35
Nonagricultural Wage and Salary Employment by Industry—New Mexico 36
Nonagricultural Wage and Salary Employment by Major Industrial Sector—New Mexico Counties, 1985 38
Nonagricultural Wage and Salary Employment by Major Industrial Sector—New Mexico Counties, 1986 39
Nonagricultural Wage and Salary Employment by Industry—Metropolitan and Nonmetropolitan New Mexico 40
Hours and Earnings in Major Industries—New Mexico 41
Military Installation Employment—New Mexico 41

FINANCE 43

Banking—New Mexico 43
Savings and Loan Associations—New Mexico 43
Credit Unions—New Mexico 44
Business Incorporations and Failures—New Mexico 44
Assets and Deposits in New Mexico Banks—Selected Cities 45
Assets and Deposits in New Mexico Savings and Loan Associations—Selected Cities 46

GOVERNMENT 47

Revenues and Expenditures of State Government—New Mexico 47
Revenues of State Government by Category—New Mexico 48
Expenditures of State Government by Function—New Mexico 50
Federal Government Expenditures—Southwest and Rocky Mountain States 50
Per Capita Federal Government Expenditures—Southwest and Rocky Mountain States 51
Federal Government Expenditures—New Mexico 52
Direct Federal Expenditures or Obligations—New Mexico Counties, FY 1983 and FY 1984 53
Direct Federal Expenditures or Obligations—New Mexico Counties, FY 1985 and FY 1986 54
County Government Receipts and Disbursements—New Mexico Counties 55
Municipal Government Receipts and Disbursements—Selected New Mexico Cities 56

HOUSING 57

Total Housing Units—New Mexico Counties 57
Year-Round Housing Units by Tenure, Value and Vacancy Rates—New Mexico Counties 58
Selected Characteristics of Housing—New Mexico Counties 59
Age of Year-Round Housing Units—New Mexico Counties 60
Year-Round Housing Units by Type of Structure—New Mexico Counties 61
Multiple Listing Sales, Residential—Selected Cities 61

INCOME 63

Per Capita Personal Income—Southwest and Rocky Mountain States 63
Earnings by Type and Industry—New Mexico 65
Components of Total Personal Income—New Mexico 66
Transfer Payments—New Mexico 66
Average Annual Pay—Southwest and Rocky Mountain States 68
Median Earnings of Selected Occupations—New Mexico Year-Round, Full-Time Workers 68

Earnings by Industry—Metropolitan and Nonmetropolitan New Mexico 69
Average Annual Pay—Selected Metropolitan Statistical Areas 71
Per Capita Personal Income—New Mexico Counties 72
Median Household Income by Race and Ethnicity—New Mexico Counties 73
Family Incomes—New Mexico Counties 74

MANUFACTURING 75

Manufacturing Establishments—New Mexico 75
Selected Manufacturing Statistics—New Mexico, 1983 and 1984 76
Selected Manufacturing Statistics—New Mexico, 1985 77

MINING 79

Production of Major Minerals—New Mexico 79
Value of Selected Minerals—New Mexico 80
Natural Gas Production and Consumption—New Mexico and U.S. 81
Oil and Gas Wells Drilled—New Mexico 82

POPULATION 83

Total Population and Population Density—New Mexico and the U.S. 83
New Mexico County Population by Census Year 84
Population—New Mexico Counties, 1950–1959 85
Population—New Mexico Counties, 1960–1969 86
Population—New Mexico Counties, 1970–1979 87
Population—New Mexico Counties, 1980–1986 88
Population Projections—New Mexico Counties 89
Population Density—New Mexico Counties 90
Components of Population Change—New Mexico Counties, 1970–1980 91
Components of Population Change—New Mexico Counties, 1980–1986 92
Population by Urban and Rural Residence—New Mexico Counties 94
Race and Ethnicity--New Mexico Counties 95
Distribution of Age Groups—New Mexico 99
Distribution of Age Groups—New Mexico Counties, 1970 100
Distribution of Age Groups—New Mexico Counties, 1980 101
Households, Families and Persons in Group Quarters—New Mexico Counties 102
Population—New Mexico Communities 103
Total Population and Land Area of Indian Reservations—New Mexico 107

POVERTY AND WELFARE 109

Aid to Families with Dependent Children (AFDC)—U.S. and Selected Western States, 1984 109
Aid to Families with Dependent Children (AFDC)—U.S. and Selected Western States, 1985 109
Supplemental Security Income (SSI) Recipients and Payments—U.S. and Selected Western States, 1985 110
Supplemental Security Income (SSI) Recipients and Payments—U.S. and Selected Western States, 1986 111
Persons Below the Poverty Level by Race and Ethnicity—New Mexico Counties 112
Medical Assistance (Title XIX) Program—New Mexico Counties 113
Food Stamp Assistance—New Mexico Counties 114

ROADS AND TRAFFIC 115

Miles of Roads and Streets by System and Classification—New Mexico 115
Vehicle-Miles Traveled by Vehicle Type—New Mexico 115
Motor Vehicle Accidents—New Mexico 115
Motor Vehicle Registration—New Mexico Counties 117

TRADE AND SERVICES 119

Number of Establishments in Retail Trade, Wholesale Trade and Services—New Mexico Counties 119
Selected Retail Trade Statistics for Establishments with a Payroll—New Mexico 120
Gross Receipts from Retail Trade—New Mexico Counties 121
Gross Receipts from Retail Trade—Selected New Mexico Cities 122
Selected Wholesale Trade Statistics for Establishments with a Payroll—New Mexico 123
Selected Statistics for Service Industries that are not Exempt from Federal Income Tax—New Mexico 124
Selected Statistics for Service Industries that are Exempt from Federal Income Tax—New Mexico 125

TRAVEL AND RECREATION 127

Employment and Gross Receipts in Tourism Related Establishments—New Mexico 127
Horse Racing Attendance and Pari-Mutuel Wagering—New Mexico 127
Attendance and Pari-Mutuel Wagering—New Mexico Race Tracks 127
Recreation Visits to National Parks and Monuments—New Mexico 127
Visits to State Parks—New Mexico 128
Albuquerque International Airport Activity 128

VITAL STATISTICS 129

Births and Deaths—New Mexico 129
Birth and Death Rates—Southwest and Rocky Mountain States 130
Births and Deaths—New Mexico Counties 130
Death Rates from Leading Causes—New Mexico and U.S. 131
Infant Mortality Rate by Ethnicity/Race—New Mexico 131
Number of Reported Cases of Selected Communicable Diseases—New Mexico 131
Marriages and Dissolutions of Marriage—New Mexico and U.S. 132
Marriages and Dissolutions of Marriage—New Mexico Counties 132
Hospitals, Physicians and Nurses—New Mexico Counties 133

VOTER STATISTICS 135

Voting and Registration in the 1984 and 1986 Elections—New Mexico 135
Voter Registration—New Mexico Counties, 1984 135
Voter Registration—New Mexico Counties, 1986 136
Votes Cast for President of the United States—New Mexico Counties 137
Votes Cast for Governor and Lt. Governor—New Mexico Counties 138
Votes Cast for United States Senator—New Mexico Counties 139
Votes Cast for United States Representative, District 1—New Mexico Counties 139
Votes Cast for United States Representative, Districts 2 and 3—New Mexico Counties 140

UTILITIES 141

Business and Residence Telephones—New Mexico 141
Total Net Generation of Electric Power—Southwest and Rocky Mountain States 141
Net Generation of Electric Power by Type—New Mexico 141
Electric Utility Statistics for Investor Owned and Rural Cooperatives—New Mexico 142
Typical Monthly Residential Electric Bills—Selected New Mexico Cities 143
Gas Utility Statistics—New Mexico 143

Per Capita Income for New Mexico Metropolitan Statistical Areas (MSA's) 71
New Mexico Manufacturing Employment 75
New Mexico and U.S. Motor Vehicle Accident Death Rates 116
New Mexico Retail Trade Gross Receipts (Growth Rate) 121
New Mexico Birth and Death Rates 129

Introduction

The 1989 New Mexico Statistical Abstract is a continuation of the first edition of the state statistical abstract issued by the Bureau of Business and Economic Research (BBER) in 1970. The 1989 edition both updates and expands upon much of the information provided in that first edition.

The new abstract contains 149 tables and 20 maps and graphs grouped under 21 major subject headings. Two new sections have been added to this edition, providing county rankings on a variety of topics and information about the public utility industry. Historical coverage varies among the tables and data that are available annually are generally shown through 1986. In addition, each of New Mexico's 33 counties is profiled.

Sources of the data are identified in footnotes accompanying each table. However, a number of state agencies were important information sources. Specifically, I would like to express appreciation for the help provided by the New Mexico Departments of Labor, Taxation and Revenue, Highway and Transportation, Health and Environment, Human Services, Energy/Minerals and Natural Resources, Corrections, Regulation and Licensing, and Finance and Administration, along with the Public Service, State Corporation, Higher Education and Racing Commissions, and the Offices of the State Engineer and Secretary of State. Federal sources have also been used, including the Departments of Commerce, Agriculture, Energy, Justice, Defense, Health and Human Services, Labor and Interior. In addition, private organizations such as Dun and Bradstreet, Inc., F. W. Dodge Division of McGraw-Hill Information Systems Company, Sunwest Financial Services, the New Mexico Credit Union League and the American Gas Association have also been used. University of New Mexico agencies that have contributed to this publication include the Division of Government Research and the New Mexico Health Resources Registry.

It is our hope that this new *Statistical Abstract* will be an important tool for planning and decision making purposes. The BBER has long been recognized as the primary source for New Mexico socioeconomic information by both government and private sectors. It is our goal to continue to serve New Mexico citizens and other persons interested in the state.

1 Median age and rankings are based on 31 counties. Cibola County was organized from Valencia County in 1981. Therefore, 1980 median age figures are not available for the two separate counties.
2 Estimates of persons 65 years and older in 1980 for Cibola County were derived by adding the Fence Lake, Grants, Laguna and Zuni-Ramah Census County Divisions (CCD's). Estimates for for Valencia County were derived by adding the Belen and Los Lunas CCD's.

* When counties share the same rank, the next lower rank is omitted.
NA Not applicable.
na Not available.
L Less than 10 jobs.
1 Percent changes are calculated for 31 counties. Cibola County was created from a portion of Valencia County in mid-1981. Therefore, average employment figures for 1981 are not comparable to 1986 figures.
2 Manufacturing sector shares are calculated for 28 counties. Due to disclosure and confidentiality rules data are not available for De Baca, Guadalupe, Hidalgo, Mora, and Sierra Counties. However, copper smelting operations in Hidalgo County ensures that Hidalgo ranks among the highest.
3 Includes farm proprietors as well as farm wage and salary workers.
4 All employment refers to all farm and nonfarm employment, including wage and salary workers as well as proprietors. Nonagricultural employment, used elsewhere in this table, refers only to nonfarm wage and salary workers.
5 Rankings based on 32 counties.

1 Average weekly private wage is computed by dividing the total quarterly pay of employees, covered by the New Mexico unemployment insurance program, by the average number of employees. That quotient is in turn divided by the 13 weeks in the quarter. Government workers and private sector workers not covered by New Mexico unemployment insurance programs are excluded.

Power	65.7	48.4
Fish & wildlife	43.3	19.6
Recreation	12.1	8.2
Reservoir Evaporation	423.5	423.5

1 The quantity of water taken from a surface water or groundwater supply. A diversion is the same as a withdrawal.
2 That part of a withdrawal that has been evaporated, transpired, incorporated into crops or products, consumed by man or livestock, or otherwise removed.
Source: N.M. State Engineer Office, Brian Wilson, Technical Report 46, Water Use in New Mexico, 1985.
Note: Of the 4,158,614 acre-feet of withdrawals, 2,456,531 acre-feet were from surface water supplies and 1,702,083 acre-feet were from groundwater supplies. Also, of the 2,171,786 acre-feet of depletions for all withdrawals, 1,207,307 acre-feet were from surface water supplies and 964,479 acre-feet were from groundwater supplies.

Federal	5.8	5.3	5.8	5.7

---

1 Membership figures are those enrollment counts used for funding purposes (for 1982-83 and 1983-84 they were the best of 40/80 day counts; for 1984-85 and 1985-86 they were 40 day counts with adjustments for the best of 40 or 80 day counts for special education).

2 Grades 1 through 3.

3 The information contained in this table is based on race/ethnic concepts that differ from U.S. Bureau of the Census race and ethnicity definitions. Various U.S. Census data are seen elsewhere in this publication.

4 May not add to 100 percent due to teachers reported in other ethnic groups and due to missing data.

5 Net operational expenditures excludes food services, noninstructional student support, community services, pupil transportation, capital outlay and special projects.

1 Excludes civilian personnel that are not direct hire, i.e., those that are not subject to Office of Management and Budget ceiling controls. Additionally, only those civilians on the Department of Defense payroll are included. A major group that is excluded are Department of Energy employees. This understates civilian employment at some bases.

Source: U.S. Department of Commerce, Bureau of the Census, Consolidated Federal Funds Report, County Areas, Volume I, selected fiscal years.

Note: The expenditures shown for the state total in this table will differ from federal expenditures for New Mexico seen elsewhere in this publication. Part of the difference arises from the treatment of grants to state and local governments. In census publications that contain data shown at the county level, federal grants generally represent obligations, and include payments to state and local governments as well as grants to nongovernmental recipients. In census publications that contain only data shown at the state level, grants to state and local governments represent actual expenditures of the federal government.

Source: U.S. Department of Commerce, Bureau of the Census, Consolidated Federal Funds Report, County Areas, Volume I, selected fiscal years.

Note: The expenditures shown for the state total in this table will differ from federal expenditures for New Mexico seen elsewhere in this publication. Part of the difference arises from the treatment of grants to state and local governments. In census publications that contain data shown at the county level, federal grants generally represent obligations, and include payments to state and local governments as well as grants to nongovernmental recipients. In census publications that contain only data shown at the state level, grants to state and local governments represent actual expenditures of the federal government.

na Not available.

1 Includes vacant and occupied year-round housing units.

2 Numbers of total year round units, total occupied units, owner occupied units, renter occupied units and vacancy rates for Cibola and Valencia Counties were estimated. Estimates for Cibola County were derived by adding the Fence Lake, Grants, Laguna and Zuni-Ramah Census County Divisions (CCD's). Estimates for Valencia County derived by adding the Belen and Los Lunas CCD's. Median values of owner occupied units and median contract rents are not shown separately for Cibola County. The medians for Valencia County include Cibola County.

3 Includes Cibola County.

p Preliminary.
1 Average annual pay is computed by dividing total annual pay of employees covered by their state's unemployment insurance programs by the average monthly number of these employees.
2 Percent changes based on unrounded data.
3 Based on data for 300 areas. Data for all areas in Colorado and Illinois are excluded.
4 Averages for 1985 and 1986 are based on 299 areas, while the average for 1984 is based on 305 areas.

NA Not applicable.
p Provisional.
1 Figures shown are for population per square mile of land area, exlcuding permanent inland water surfaces. Population density calculations for the United States are based on different land area estimates for each census year. However, the 1986 density calculation was based on the 1980 land area calculation. In the case of New Mexico, population density calculations for all years are based on the 1980 land area estimate of 121,335 square miles. In 1980 there were 258 square miles of inland water, resulting in a total area of 121,593 square miles.
2 Population density figures given for various census years represent the area within the boundaries of the United States which was under the jurisdiction of the United States on the date in question, including in some cases considerable areas not then organized or settled and not covered by the census. In 1870, for example, Alaska was not covered by the census.
3 The census count shown for 1870 includes adjustments for under enumeration in the Southern States.

NA Not appplicable.
1 1921: Catron County was organized from part of Socorro; Harding County was organized from parts of Union and Mora.
2 1917: De Baca County was organized from parts of Chaves, Guadalupe, and Roosevelt; Lea County was organized from parts of Chaves and Eddy; Roosevelt County annexed a strip of land from Chaves.
3 1981: Cibola County was organized from part of Valencia County.
4 1919: Hidalgo County was organized from part of Grant.
5 1949: Los Alamos County was organized from parts of Sandoval and Santa Fe.
6 The metropolitan portion of New Mexico is defined by the three Metropolitan Statistical Areas (MSA's) existing as of 1984. They are the Albuquerque MSA (Bernalillo County); the Las Cruces MSA (Dona Ana County); and the Santa Fe MSA (Santa Fe and Los Alamos Counties). Separate estimates for Los Alamos County are not available before 1950.
7 Part of Rio Arriba annexed to Santa Fe and part of Santa Fe annexed to Rio Arriba prior to 1950.
8 Part of Sandoval annexed to Santa Fe prior to 1950.

1 The urban population comprises all persons living in urbanized areas and in places of 2,500 or more inhabitants outside urbanized areas. The population not classified as urban constitutes the rural population.

2 An urbanized area comprises an incorporated place and adjacent densely settled surrounding area that together have a minimum population of 50,000.

3 Estimates for Cibola County were derived by adding the Fence Lake, Grants, Laguna and Zuni-Ramah Census County Divisions (CCD's). Estimates for Valencia County were derived by adding the Belen and Los Lunas CCD's.

z Equals less than 0.05 percent.

1 The total population is the sum of each racial group: White, Black, American Indian, Asian/Pacific Islander and other (not elsewhere classified) races. Persons of Hispanic origin may be any race. Percent detail may not add to totals due to rounding.

2 Counts for total White, White Hispanic, total Black, and Black Hispanic have been revised by the Bureau of the Census for the National Cancer Institute to include persons who initially designated "other races" in their response to the census. The information presented in this table reflects those revisions. Census publications and tapes present unmodified data.

3 Total counts for persons of Hispanic origin have not been revised. The distribution by race has been revised to reclassify as "White" or "Black" persons of Hispanic origin who initially reported in the residual "other races" category.

a Approximate.
na Not available.
1 Persons of Hispanic origin may be of any race.
2 The percent of persons below poverty, or poverty rate, is calculated by the following method. The number of persons below poverty within each race or ethnic group is taken as a proportion of the total number of persons for whom poverty status was determined within the same race or ethnic group. This total base is not shown separately.
3 Estimates for Cibola County were derived by adding the Fence Lake, Grants, Laguna and Zuni-Ramah Census County Division (CCD's). Estimates for Valencia County were derived by adding the Belen and Los Lunas CCD's.

1 By county of residence.
2 Rate per 1,000 persons.
3 Crude rate per 1,000 persons.
4 Births for Cibola and Valencia Counties were estimated for 1981 on the basis of the distribution in 1982 (the first year for which separate data are available).
5 Deaths for Cibola and Valencia Counties were estimated for 1981 on the basis of the changing distribution of deaths from 1980-81 (Census Bureau estimated splits) to 1982.
Source: N.M. Health and Environment Department, Health Services Division, New Mexico Selected Health Statistics, 1965; and unpublished reports.
Note: Birth and death rates were calculated using revised unrounded population estimates for 1981 and provisional unrounded estimates for 1986.

1 Practicing nonfederal M.D.'s and Doctors of Osteopathic Medicine.

2 Beds counted include medical surgical, pediatric and OB/GYN. Additionally, they are operational rather than licensed beds. However, if operational bed counts are not known, then licensed beds are counted.

3 Based on provisional 1986 population estimates.

4 Includes those persons licensed to practice nursing in New Mexico who are employed full- or part-time, by county of employment. If an employed nurse did not respond to county of employment, county of residence was used. Military and Indian Health Service nurses are not required to hold New Mexico licenses.

Source: N.M. Health Resources Registry, UNM, Statistical Summary, 1986-1987.

Note: Nonfederal excludes such facilities as military, Indian Health Service, Public Health Service and VA hospitals.

Voter Statistics

VOTING AND REGISTRATION IN THE 1984 AND 1986 ELECTIONS--NEW MEXICO

	1984		1986	
	% Reported Registered	% Reported Voted	% Reported Registered	% Reported Voted
Total Voting Population	69.6	61.7	60.7	47.1
White[1]	70.7	62.9	62.9	48.7
Spanish Origin[1]	62.1	51.1	59.4	46.7

1 Data on other ethnic groups and races are not available. Also, people of Spanish Origin can be of any race, and, therefore, comprise a portion of "White."

County Profiles

New Mexico

The State of New Mexico lies south of Colorado and is bounded on the east by Texas and on the west by Arizona. The country of Mexico and the state of Texas are its neighbors to the south. New Mexico is the fifth largest state in land area with a low population density of 12.2 persons per square mile as of 1986. Nearly a quarter of the population is concentrated in Albuquerque, the State's largest city. The economy of the State is heavily dependent upon the government sector, but is in transition from its reliance on mineral and energy extraction to a growing manufacturing, retail trade, and service base. The State also has many tourist attractions including wilderness and ski areas, the Santa Fe and Taos art communities, and its unique tricultural history.

Bernalillo

Bernalillo County, located in the central portion of the state, is bisected by the Rio Grande and bounded on the east by the Sandia Mountains. Although the second smallest in land area, Bernalillo is New Mexico's most populous county in which almost one third of the state's population resides. Most of the population is concentrated along the Rio Grande in Albuquerque, the state's largest city. By New Mexican standards, Albuquerque's economy is diverse, although it is still heavily reliant on governmental expenditures at such institutions as Kirtland Air Force Base, Sandia Laboratories, the University of New Mexico, and the Veterans Hospital. Albuquerque is the center of transportation, wholesale and retail trade, finance, and medical service within the State. Tourism also contributes to the county's economic base and, within the last few years, several major electronics manufacturers have located plants in the Albuquerque area.

Catron

Catron County is centrally located on the state's western border in the heart of some of the most spectacular country in the Southwest. The terrain consists predominantly of mountains and high mesas with extensive plains regions in the north and east. Largely undeveloped, the county is New Mexico's largest and most sparsely populated. There were no incorporated communities in Catron as late as 1974, when the county seat of Reserve incorporated with a population of 375. More than half the land area is designated as one of three national forests: the Gila, Cibola, and Apache. A portion of the Gila Forest was declared wilderness in 1924, making it the oldest declared wilderness in the U.S. The county's economic base is largely confined to cattle ranching and government employment. Like many other rural New Mexico counties, population remains small with consistently low incomes and high rates of unemployment.

Chaves

Located in the southeastern quadrant of the state, Chaves County is New Mexico's fourth largest county in land area. The county is relatively low in elevation, its terrain varying from flat land to rolling hills. The Pecos River roughly bisects the county north to south, forming the major watershed. The county seat, Roswell, is the major population center with a 1986 population of 44,110. Prior to the 1968 closing of Walker Air Force Base in Roswell, much of the county's economy was based on federal expenditures. Subsequently, agriculture, manufacturing and mining (petroleum and natural gas) have become the mainstays of the area's economy. However, like other oil and gas producing counties, Chaves County has been negatively affected by the recent declines in the price of oil. Roswell's position as a regional trade and service center also contributes to the county's economic base. Many of the abandoned air base buildings have been converted to manufacturing facilities, including the area's largest manufacturer, Transportation Manufacturing Corporation; others have been employed to establish a branch campus of Eastern New Mexico University. The New Mexico Military Institute is also located in Roswell.

Cibola

Cibola is the newest county in New Mexico, created by the state legislature in July 1981. It was carved from the western portion of Valencia County, extending to the east to Bernalillo County and west to the Arizona border. The northern portion of the county is fairly mountainous, with much of this area within the Cibola National Forest. A lava flow lying east of the Continental Divide winds its way southward through the middle portion of the county. The county is sparsely populated, with the largest community of Grants having a 1986 population of 8,520. Low demand for uranium has meant the loss of almost all of the county's active uranium mining and milling operations in recent years. Although this has severely depressed the county's economy, there has been some encouraging signs with the arrival of several small manufacturers in the Grants area, along with a new state correctional facility and district State Highway Dept. office. In accordance with the current county boundaries, Cibola's 1986 population was estimated at 23,000, a decrease of 24.2 percent since 1980.

Colfax

Bordering Colorado, Colfax County incorporates both mountains and high plains with altitudes ranging from 5,800 to over 12,000 feet. Mining, particularly coal, has long been the major income-producing activity in the county. Since coal mining activity peaked between 1915 and 1920, Colfax County has faced a declining economy and population. Between 1920 and 1970 the population fell from 21,550 to 12,170. During the 1970s and 1980s there seemed to be some reversal of this trend, as coal production has shown moderate improvement. Cattle and hay production as well as manufacturing and tourist-related activities are also components of the county's economy. Local tourist attractions include the Philmont Scout Ranch, the National Rifle Association's Outdoor Center, several ski areas, and La Mesa Park, a horse race track located in Raton. Raton is the county's largest community and seat of county government.

Curry

Located on the Texas-New Mexico border, the landscape in Curry County consists of flat farm and grass land interrupted by occasional rolling hills. The farmland typically produces more wheat, corn, and feed sorghum than any other county in the state. More economically significant than the croplands are the county's feedlots, the largest of which is located at Clovis. Clovis, also the county seat, is the major population and trade center for east-central New Mexico and parts of Texas. Cannon Air Force Base, near Clovis, is the most important single source of personal income in the county. Manufacturing is dominated by the food processing industry.

De Baca

Located in the east-central region of New Mexico, the landscape of De Baca County consists of rolling plains and mesas divided from north to south by the Pecos River. The economy of the county is based almost wholly on the livestock industry. Consequently, personal income is closely related to cattle prices which are subject to substantial fluctuation. In addition to agriculture, some income is generated in the trade, services and government sectors. Fort Sumner, with a 1986 population of 1,350, is the county seat and the only incorporated place in the county. The town is named after an old fort which housed the military from 1862 to 1869 in order to oversee some 7,000 Navajos who were interned nearby.

Doña Ana

Dona Ana County has the second largest population in New Mexico and is the sixteenth largest in land area. Situated in the south-central portion of the state, it has a common border with both Texas and Mexico. The El Paso-Juarez metropolitan area lies just across the border. Agriculture and population centers are located along the Rio Grande, which traverses the county from the northwest to the southeast corner. Crop production is an important aspect of the Dona Ana economy, particularly cotton and vegetables (lettuce, onions, chili, and tomatoes). Outside of the Rio Grande Valley, most of the county is sparsely populated, semiarid flat and low mountain land suitable only for ranching. In addition to agriculture, Dona Ana derives substantial economic benefit from federal expenditures associated with the White Sands Missile Range near Las Cruces and New Mexico State University, the state's second largest university located in Las Cruces. The county is served by two major interstate highways, Interstate 10 and Interstate 25 which intersect at Las Cruces, the county seat and the third largest city in the state.

Eddy

Eddy County is located near the southeast corner of the state, bordering Texas on the south. The Pecos River crosses the county from north to south and enters Texas at the lowest elevation in New Mexico (2,841 feet). The river has been dammed at several points in the county forming various reservoir lakes. Irrigated land in the Pecos Valley produces hay and cotton, but most of the county is semiarid brush and grassland suitable only for cattle ranching. Mining of potash, oil, and gas provides the principal source of income in the county. However, the potash industry until recently has been suffering from strong foreign competition and a weak agricultural sector, while low oil prices have severely hurt the oil and gas extraction industries. Agreements in 1987 with Canadian producers have now improved the prospects for the New Mexico potash industry. Tourists visiting Carlsbad Caverns National Park and the Lincoln National Forest also contribute to the economic base. Carlsbad, the most populous community and county seat, has commanded national attention as the location of the Waste Isolation Pilot Project (WIPP), a national radioactive waste depository near the city.

Grant

Grant County, bounded on the west by the Arizona border, is situated in the southwest quadrant of the state. The terrain consists of mountains with occasional rolling flat lands. The source of the Gila River and its tributaries is in the mountainous north-central region of the county and flows into Arizona. Portions of the Gila National Forest and Wilderness Area, the oldest designated wilderness in the U.S., occupy approximately one-third of the county's total area. Metal mining, particularly copper, has dominated economic activity for more than 150 years. Although the mining industry continues to be the county's third largest employer, after trade and government, the county's heavy dependence upon the copper industry made the effects of the last recession particularly severe. The unemployment rate rose from 7.6 percent in 1980 to 11.7 percent in 1986. Ranching, tourism, and governmental expenditures also contribute to the economic base. Silver City, the county seat and largest community in Grant County, is the site of Western New Mexico University.

Guadalupe

Guadalupe County is located on the east-central plains of New Mexico. Like other surrounding counties, the terrain consists mostly of flat grassland and brushland interrupted by small hills and mesas. The Pecos River crosses the county from the northwest to southeast before flowing into the Alamogordo Reservoir just south of the Guadalupe-De Baca County line. Santa Rosa, the largest community and county seat, lies on Interstate 40, about halfway between Albuquerque and the state's eastern border. Servicing travelers on Interstate 40, Santa Rosa's motel-restaurant businesses provide the county's chief source of personal income, but cattle ranching is also an important activity. Guadalupe tends to be one of New Mexico's poorer counties, partly because of the traditionally low wages associated with the trade, services and agricultural sectors.

Harding

Located in northeastern New Mexico, the landscape of Harding County consists of vast plains and mesas bounded on the east by the steep-sided Canadian River Canyon. Personal income in the county is derived almost exclusively from cattle ranching which varies substantially from year to year. State and local government expenditures along with trade, services and manufacturing sectors also contribute to the economic base of the county. Harding has been losing population since its creation in 1921 when approximately 5,000 people lived in the county. Based on the 1986 population of 1,000 people, Harding is the least populous and the second least densely populated county in the state.

Hidalgo

Bordering Arizona and Mexico and located farther south than any other New Mexico county, Hidalgo County forms the southwestern corner of the state. The terrain varies from semiarid plains, dotted with extensive alkali, flat and playa lake regions, to rugged mountain ranges with elevations ranging from 3,700 to 8,500 feet. The economy of Hidalgo County is tied historically to the travel service industry. Travelers came first by stage coach, then by railroad, and now by interstate highway. Interstate crossing the northern third of the county, is a major east-west transcontinental thoroughfare, particularly when winter creates hazardous driving conditions farther north. Agriculture, especially cattle ranching, is another traditional mainstay of the county's economy. In the late 1970s copper refining also became important economically because of the location of the Phelps-Dodge Hidalgo Smelter near Playas. Lordsburg, located on the rail line and Interstate 10, is the most populous community and county seat.

Lea

Forming the southeastern corner of the state, Lea County shares its borders with Texas on the south and east. The terrain is chacterized by vast grassy plains and brushlands dotted with numerous playa lakes. Traditionally one of the more prosperous counties in the state, Lea's income is derived chiefly from the production of oil and natural gas. Because of rising oil prices in the 1970s and increased exploration activities, employment in the mining sector grew steadily through the decade. However, the recent steep drop in the price of oil has caused oil and gas extraction employment to fall from 7,245 jobs in the fourth quarter of 1985 to 4,820 jobs in the fourth quarter of 1986. Cattle and crops also play a major role in the county's economy. While Lovington is the seat of county government, Hobbs is the largest community in the county with 34,870 people in 1986.

Lincoln

The Jicarilla and Capitan Mountains separate the plains lying to the east and west of them in centrally located Lincoln County. A relatively recent lava flow, known as malpais, covers much of the southwestern corner of the county. Part of this area has been designated as Valley of the Fires State Park. Lincoln is best known for its range wars waged in the late 1870s for political and economic dominance of this region. Cattle ranching which dominated the local economy was at the heart of the dispute. Ranching continues to be important today, but the recreation-tourism industry has surpassed it as the principal source of income. Parts of two national forests, a ski resort, a horse racing track and a motel-restaurant-resort complex draw tourists and provide most of the jobs in the county. Ruidoso is the largest community, but Carrizozo is the seat of county government.

Los Alamos

Situated in the Jemez Mountains, the landscape of Los Alamos County consists of relatively high mountains and plateaus intermittently cut by deep canyons. New Mexico's smallest county was created from parts of Sandoval and Santa Fe Counties during World War II to provide a secure and isolated location for the development of the world's first atomic bomb. Since the successful completion of the Manhattan Project, the emphasis on research conducted at Los Alamos National Laboratory (LANL) has changed somewhat, but the concept of Los Alamos as a federal "think tank" has remained unaltered. More than 93 percent of the land in the county is held by the federal government, and the government sector is directly responsible for almost 65 percent of all jobs in the county and indirectly responsible for most of the employment in retail trade, services and construction. Because of the county's unique economic base, residents generally have enjoyed the highest average incomes, the highest levels of education, and have been subject to the lowest rates of unemployment in the state. An estimated 18,200 people lived in the county as of 1986.

Luna

Located on the state's southern border, the terrain in Luna County consists of semiarid plains interrupted by scattered mountains. While cattle, cotton, and sorghum are traditional mainstays of the economy, manufacturing and tourism have recently come to play increasingly important roles. Additional support comes from the growing number of retired citizens wishing to take advantage of the warm and sunny climate. Deming, the largest community and county seat, is located on Interstate 10 which is a major east-west transcontinental thoroughfare, especially during the winter months when northern driving conditions are unpredictable and hazardous. Much of the economy of Deming, and in turn Luna County, relies upon the tourist-related establishments located along this route. Two major tourist attractions are Rock Hound State Park, a geologic phenomenon, and Pancho Villa State Park, a historical site commemorating the famous Mexican revolutionary's raid on the border town of Columbus, New Mexico.

McKinley

Situated on the New Mexico-Arizona border, McKinley County lies on the southeastern portion of the Colorado Plateau with elevations ranging from 6,000 to 9,150 feet. The terrain varies from pine-forested mountain regions to the grassland and bushland of lower mesas. Erosion has played an important part in shaping the landscape of the semiarid region, exposing sandstone cliffs and cutting deep arroyos in the high mesas. Because portions of the Navajo and Zuni reservations are located within the county, more than 60 percent of the land is Indian-owned. McKinley is the only New Mexico county in which Native Americans are in the majority; approximately 66 percent of the population is Indian. The economic base of the county is provided by the mining, government, trade and services sectors. McKinley is an energy-rich county producing uranium, coal, natural gas and petroleum. Until the recent declines in oil prices and the drop in uranium demand, mining activity had increased dramatically in response to national energy problems. The government sector is also an important component of the county's economy, because of federal monies directed toward improvement of conditions of the Native American population. The tourist related trade and services sectors form another important part of the McKinley economy, especially in Gallup, the largest community in the county.

Mora

The rugged, scenic Sangre de Cristo Mountains in the western portion of Mora County gradually level off to a high grassy plain. The eastern boundary of the county is formed by the steep-sided Canadian River Canyon; scattered peaks and ridges occasionally rise out of the otherwise flat plains. Large scale ranching operations on the plains constitute virtually the only nongovernmental revenue source in Mora, but these big ranches contribute little to the county's economy. For many years Mora County has experienced declining employment and population, erosion of its economic base, and low per capita income. Governmental expenditures constitute the principal source of income in the county, mostly in the form of transfer payments (Social Security and Welfare), health, social services and education. Wagon Mound, located on Interstate 25, is the largest community in the county with a 1986 population of 420 people.

Otero

Otero County, located in the south-central portion of the state, is New Mexico's second largest county in terms of land area. The terrain varies from pine-forested mountains in the north and east to the semi-arid plains of the southwest. Elevations range from 12,000 to 3,600 feet. A lava flow extending south from Lincoln County covers much of the northwestern quadrant, while the gypsum dunes of White Sands National Monument continue southward from the lava flow. The federal government owns 68 percent of the land, with another 11 percent in the Mescalero Apache Reservation. The federal government plays a major role in the county's economy through expenditures connected with the operations of White Sands Missile Range, Holloman Air Force Base and to a lesser extent the Mescalero Reservation and Lincoln National Forest. Tourist-related activity and light manufacturing contribute to the economic base. Alamogordo is the largest community and county seat.

Quay

Located in the north-central region of the state's eastern border with Texas, the landscape of Quay County generally consists of grassy mesas and rolling plains cut by numerous arroyos and canyons. The Canadian River which flows from west to east across the northern part of the county has been dammed to form Ute Reservoir, the most important tourist attraction in the county. Tourism is also relatively important to the Quay economy because of the county's proximity to Conchas Reservoir and the location of Interstate 40 which spans the entire width of the county. Despite the importance of tourist-related activities, the economy is largely dependent on agriculture and, consequently, income fluctuates substantially because of dependence upon weather and market conditions. Transfer payments and state governmental expenditures constitute another important source of income to the county residents, over 65 percent of whom live in Tucumcari. The railroad, once an important element of the Tucumcari economy, has been gradually replaced by the highway, first U.S. 66, now upgraded to Interstate 40.

Rio Arriba

One of New Mexico's larger counties, Rio Arriba borders Colorado on the north. The Continental Divide splits the county in a north-south direction. To the east are mountains, foothills, narrow river valleys and generally broken terrain. To the west, the foothills give way to a semiarid plateau chacterized by high mesas, sheer sandstone cliffs and formations, dry washes and canyons. The San Juan River, dammed to create Navajo Reservoir, forms the northwestern boundary of the county. The Jicarilla Apache Reservation and a portion of the Carson National Forest occupy much of the land along and to the west of the Divide. More than half of the land is federally-owned. The Forest Service manages two wilderness areas and the national forests in which they are located. Economically, Rio Arriba is one of New Mexico's depressed, agriculturally based northern counties. Government spending in the form of construction projects, transfer payments, and wages is the most important source of personal income in the county. Tourism and some mining (petroleum and natural gas) provide additional economic activity.

Roosevelt

Roosevelt County is located near the middle of the Texas-New Mexico border in a region known as the Southern High Plains or the "Llano Estacado." A ridge or caprock running along the western border of the county also defines the western boundary of the Southern High Plains in many instances. From the caprock in the west where elevations average about 4,600 feet, a plain slopes gradually toward the Texas border where elevations average about 4,100 feet. As in most of the eastern counties, agriculture, particularly livestock production, is a major income-producing activity. However, substantial quantities of crops are grown on the county's irrigated farmland; the once-dominant cotton crop has now been replaced by grains (sorghum, wheat and corn) and peanuts. In addition to agriculture, government spending, mainly in connection with Eastern New Mexico University (ENMU), is becoming increasingly important. ENMU is located in Portales, the most populous community and seat of county government.

Sandoval

Sandoval County is located in the north-central portion of the state, with Bernalillo County on its southern border. The Rio Grande traverses the southeastern corner of the county entering through the narrow, precipitous White Rock Canyon. Below the canyon, the river is dammed to form Cochiti Reservoir, south of which the economic and population center of the county is located. The Jemez Mountains of the Santa Fe National Forest dominate the landscape of the northeast quadrant, while the terrain of the rest of the county consists of semiarid, high mesas, dry washes, and arroyos. Native Americans, a traditionally impoverished group, comprised approximately 27 percent of the county's 1980 population. A growing proportion of the county's population lives in Rio Rancho located near the Bernalillo-Sandoval County line. Intel, a large electronic manufacturer is located just across the county line on the Sandoval side. Although government still provides the greatest proportion of personal income, the manufacturing industry has become a major source in recent years.

San Juan

San Juan County forms the northwestern corner of the state, bordering Arizona, Utah, and Colorado. This location, known as Four Corners, is the only place in the U.S. where four states meet at one point. Situated on the Colorado Plateau, extensive erosion has created the mesas, deep canyons, dry washes, protruding volcanic rocks and buttes which characterize the semi-arid region. The San Juan River flows from Colorado to the Navajo Reservoir in the northern part of the county and eventually empties into the Colorado River. Nearly 60 percent of the land is held by the Navajo Nation and another 29 percent is federally owned. Mineral production, particularly coal, natural gas and petroleum, is the principal economic activity. As a consequence of energy development in the 1970s, the county's economy underwent rapid growth accompanied by population increases. Additionally, massive reserves of low-sulfur coal were tapped for electric generation. However, the recent oil price declines and the resulting adverse effects on the oil and gas industry caused a slowdown in economic growth and an increase in unemployment rates. Although energy production is the cornerstone of the San Juan economy, government spending, tourism, and Farmington's position as a regional trade and service center are also important to the county's economic base.

San Miguel

The terrain of San Miguel County varies widely from 11,800 foot peaks in the rugged Sangre de Cristo Mountains in the western portion, to broad, flat plains of less than 4,000 feet in the east. Between the mountain and the plains is another distinct region known as the Las Vegas Plateau, while Glorieta Mesa in the southwestern corner represents still another distinct zone. The sources of the Pecos River and its tributaries are located in the Sangre de Cristos and flow in a southeasterly direction. The Canadian River has been dammed to form Conchas Reservoir. Although still a predominately rural county, agriculture has employed fewer people as production has shifted from crops to less labor-intensive cattle ranching operations. Manufacturing has become more important with the addition of the Montana de Fibre fiber board plant in Las Vegas. Government spending is currently the largest component of personal income, particularly state spending at Highlands University and New Mexico State Hospital both of which are located in Las Vegas. Las Vegas, the largest community and county seat, is located on Interstate 25.

Santa Fe

The terrain in the southwest corner of Santa Fe County consists primarily of plains. The rest of the county can be characterized as mountainous, generally sloping westward from the lofty peaks of the Sangre de Cristo Mountains (elevation 12,600+ feet) in the east to the Rio Grande in the west. Santa Fe County is relatively prosperous in comparison with other northern counties. The City of Santa Fe, New Mexico's state capital, almost wholly dominates the county's economy. In turn, the city's economic well-being is related to state government and tourism. Unlike neighboring counties, employment opportunities have been steady in Santa Fe because of the dominance of state government. The county also has many tourist attractions including the Santa Fe National Forest and its Pecos Wilderness, Santa Fe Ski Basin, the Santa Fe Opera, the Santa Fe art community, Santa Fe Downs, and the unique tricultural character of the city. Santa Fe has been New Mexico's capital since the early 1600s and it is also the state's second largest city with a 1986 population of 55,980.

Sierra

Sierra County is located in the southwest quadrant of the state. The Rio Grande, which bisects the county from north to south, lies at the base of a trough formed by parallel mountain ranges along the eastern and western borders. The river is dammed at two points within the county, forming two of the largest reservoirs in the state, Elephant Butte and Caballo. Gold and silver discovered in the western mountains led to original development, but the rich deposits were quickly depleted and the area largely abandoned. Now, income is derived chiefly from the sizable retired community residing in Truth or Consequences, the largest town and county seat. Government spending and tourism, mostly associated with the county's two manmade lakes, are also important aspects of the Sierra County economy.

Socorro

The terrain of New Mexico's third largest county consists of semiarid plains interrupted by four mountain ranges. Socorro County is roughly divided by the Rio Grande along which virtually all of the population is distributed in numerous small farming communities. Economically, the county reached its zenith around the turn of the century when wagon trains laden with ore mined from the surrounding mountains filled the streets of Socorro. The livestock industry was also thriving at that time. Magdalena, a town located approximately 25 miles west of the river, was a large cattle and wool shipping point in the state and one of the major stock centers in the country. By 1920, the mines were depleted, the cattle boom was over, and the economy gradually declined. Population in the county, however, has remained stable at about 10,000 since the early 1900s, increasing to 14,700 in 1986. The Socorro County economy is now based chiefly in government spending, particularly state spending in connection with the New Mexico Institute of Mining and Technology. The location of the institute attests to the county's former prominence in the mineral industry. In addition, Interstate 25 which parallels the Rio Grande provides the county with some tourist-related income.

Taos

Located centrally on the state's northern border, Taos County has some of the most spectacular scenery in New Mexico. The lofty peaks of the Sangre de Cristo Mountains in the east are set off by a broad high plateau occupying the central and western portion of the county. The Rio Grande traverses the plateau, twisting and tumbling through the deep incised, walled canyon of the Rio Grande Gorge. The sources of numerous tributaries are located in the mountains which eventually join the Rio Grande to the west. Typical of New Mexico's northern mountainous counties, agriculture was once the chief source of income for the predominately Hispanic population, but the shift to more capital-intensive farming techniques has virtually eliminated this source of income. Tourist-related activity currently provides one major source of income. Attractions include the Carson National Forest, the Rio Grande Gorge, several ski resort areas, and Taos Pueblo and its highly reputed art community. Mining of molybdenum by Molycorp Inc., until recently, had also been an important part of the economy. However, Molycorp suspended operations in 1986, laying off approximately 900 workers. Taos County currently has one of the higher unemployment rates in the state.

Torrance

Torrance County is located in the central portion of the state, bounded on the west by the Manzano Mountains. The open rolling plains which dominate the remainder of the county are broken by scattered ridges and mesas in the south and east. Most of the county lies in one of three topographically closed basins, principally the Estancia Basin. Torrance is a rural county; no community in the county has more than 2,000 people. Its economy, once based almost wholly on agriculture, now is mostly dominated by state and local government spending. In the 1940s, Torrance was the pinto bean capital of the world. However, drought and weakening demand have almost eliminated the spotted bean as a cash crop. Potatoes have also been an important cash crop at times. Cattle raising now dominates the agriculture sector. The county's population reached a peak of 11,026 in 1940, but by 1970 the number had declined to 5,290. The 1986 population estimate of 9,000 indicates renewed activity and growth.

Union

Union County forms the northeast corner of the state, bordering Colorado on the north, and Oklahoma and Texas on the east. High mesas, deep canyons and desiccated plateaus interrupted by occasional volcanic mountains define the terrain in the northwest portion of the county. Plains dominate the south and east broken only by scattered hills and intermittent arroyos. The grassy plains are well suited for cattle ranching, which directly or indirectly provides much of the nongovernmental revenue and employment. Despite its heavy reliance on agriculture, Union County is relatively prosperous. However, income is subject to substantial fluctuation because of its dependence on range and market conditions. The number of unemployed persons is usually small despite declines in the number of available agricultural jobs. Clayton, a town of 3,340 in 1986, is the county seat and major community in the county.

Valencia

Valencia County is located in the west central portion of the state, bounded by Cibola County to the west and the Manzano Mountains to the east. Prior to July 1981 the county was over three times larger in area, extending west to the Arizona border and north to McKinley County. In that year the state legislature created Cibola County, carving it from the western portion of "old" Valencia County and reducing "new" Valencia to one of the smallest New Mexico counties in terms of land area. The Rio Grande traverses the middle portion of the county, flowing through a valley formed by the Manzano Mountains on the east and a mesa on the west. The population is concentrated along the flood plain of the Rio Grande. The economy here is largely dependent upon residents who commute to jobs in Albuquerque or work in the Santa Fe Railroad shops in Belen. However, the government sector is the largest provider of jobs within the county itself. In accordance with the current county boundaries, Valencia's 1986 population was estimated at 36,400 persons.
